

THE MAKING OF ALISON

First we started by creating a structure to secure Alison to, we used offcuts of wood we had lying about

We then added her clothes to the frame and began stuffing them with straw

As she is wearing shorts and short sleeves we made her limbs using some clear netting and straw

We then secured these into place using string where required

Next we made her head using the straw and clear netting and attached to the frame

Lastly we added the finishing touches and dropped her off at her new home!
